

YOUR POOL, ON AUTOPILOT

SI-Pool

**Stop fiddling.
Start swimming.**

SI-Pool runs the pump on the right schedule, keeps the water at the temperature you've asked for, watches the filter for you, and gives you a friendly dashboard you can open from anywhere.

**First year of remote access on us.
Wi-Fi optional, sanity included.**

For homeowners, holiday homes & smart-home enthusiasts
si-sa.co.za

28.4°C

Target 28.5 °C · Heating

From the lounge or the airport

Live temp · Schedule · Heater · Filter · Pump safety

STOP TIMING. START SWIMMING.

Your pool, sorted.

Pool ownership shouldn't be a part-time job. SI-Pool quietly looks after the boring bits — running the pump on schedule, watching the filter, keeping the water warm — so you only hear from it when something actually needs your attention. And when you want to make a change, the dashboard is on your phone, not behind the gate.

● **ALWAYS THE RIGHT TEMP**

Set your target temperature and forget about it. SI-Pool nudges the heat pump on and off so the water's ready when you are.

● **THE PUMP RUNS ITSELF**

Two daily run-windows handle filtration on autopilot. Run-now and off buttons are right there if you want a quick override.

● **CATCH PROBLEMS EARLY**

SI-Pool watches the pump and the filter for you. A dirty filter or a dry pump gets a heads-up the same day — long before it gets expensive.

● **FROM ANYWHERE**

On the home network, open si-pool.local. Out and about, the same dashboard is on your phone over a secure remote link — first year on us.

● **PRIVATE BY DESIGN**

Local-first. The dashboard runs on the device itself; nothing leaves your network unless you're viewing it remotely. No ads, ever.

● **PLAYS NICE WITH SMART HOMES**

Already on Home Assistant? SI-Pool slots straight in — every reading and switch shows up automatically, no YAML required.

PERFECT FOR

Family pools · Holiday homes · Estate & cluster pools · Solar-heated pools · Smart homes

If you own a pool, SI-Pool pays for itself the first time it catches a problem.

THE PLAIN FACTS
